The 12th International Conference on Numerical Methods in Industrial Forming Processes

Exhibition

For the first time in France since 1992
A major international event in numerical Methods for forming processes

The conference is open to any communication connected with modeling and numerical simulation methods in materials forming. The main topics are presented on the web site of NUMIFORM’2016.

In addition to the oral and poster presentations an industrial exhibition will be organized during the three days of the conference.

Come to meet worldwide scientists and engineers in forming technologies!

More than 350 participants from industry and academia are expected to attend NUMIFORM 2016

Oral presentations, will take place in several parallel sessions.

A poster session will be organized during which the participants will be encouraged to visit the exhibition stands

An industrial exhibition will be organized at the heart of the conference during the three days including events dedicated to engineers
